Great Haul of Counterfelters in Canada-Science of Dies and Plates. [From the Portland Advertiser, August 9.] We understand that High Constable Clark, of Sher

brooke, with his posse, made a descent upon two
sangs of counterfeiters, in Canada, on the night of
largust 1, at 11 o'clock, and although they were
situated live miles distant from each other, yet the
arrangements were so perfect that within forty mi-

arrangements were so perfect that within forty minute every man in or around the premises, ten in all, were chained band and foot.

Sentinels were then posted at every point to keep in intruders, and a search was commenced through fields and forests, which was continued night and day for for ty-eight hours, by which time the officer bad in their possession one printing press, twenty six plates for paper money, one machine for stamping gold and silver, (which weighed eight hundred pounds,) twenty four moulds for running hard money, dies, ink, paper, engravers' tools, and thousands of dollars in constense it money. This is probably the greatest strike ever made on this continues.

The Canadian government does well to employ such a man as High Constable Clark, who on this consistency and efficient officer; and with such a man as Ir. Sunner Busham, the agent of the American banks, to cooperate with them in such cases, we onably expect that something

may reasonably expect that something will be accomplished.

This band was probably one of the most important and well organized in Canada or the United States; they had their engravers, who could make all their plates, and their printers and signers, all of whom are safely lodged in Montreal jail.

From their camp thousands of dollars were every menth sent out broad-cast over the land, and hon dreds of our young men were in consequence less that the contract of the prison and ruin These faithful officers deserve to be handsomely rewarded for their efforts to break up such dens o pobbers and swindlers.

A correspondent of the Boston Traveller formshe the following additional facts:

You will have received by the last train the Por hand papers detailing the arrest in Canada of a gar of counterfeiters, which the Advertiser truly 8a was one of the most important and well organize to Canada or the United States. Some additions there have just come to my knowledge on board it mans. Since the middle of June it is known that \$16,000 have been issued on the Nashua Bank along and sent chiefly to the State of New York; but considerable quantiles have been sent into Musse charetts.

fitted to deceive a practised eve. I have examined
specimens of \$1, \$3, and \$20, of this and other
hanks, which are executed with singular skill, both
in the engravings and signatures. Mr. Burnham,
referred to in the article, deserves great credit for
his skill, perseverance and success, justifying the
sonfidence recessed in him by the bank.

Per some four months has he been upon the track,
having caused in that time the arcest of some twenty, and from information cerviced in part from these
has the stronghold of the gang been broken up. Six
of these previously arrested are to be tried in Maine
a few days. One machine, or press, which it took
ix men to fift, was found concealed in a large
tone heap. Of the dies for gold and silver coins, a
sakel was found, recently sent from Boston. It
equired a two horse team to parry the materials

Surrosed Munder by a Boy.—A line Horn, age is sout sixt en years, left his father a house in the win of Miliville, in this county, on the 26th alt, company with another boy named George Jock on about twelve years old, for the purcess of athing in Apple tiver. On the return of Jackson years inquired of, where he had left a lora? He plied that he had got drowned at a pig we called one Rock. Search was made for the bod want in serveyered on the 29th. On examin ing the dy it was found that the deceased had bea 2 shot, a ball entering the mouth. An inquest way beid the body, and the verdict was such that Jackson is committed to juil for murder. It appeared must be evidence, that Jackson took with h im, can be went to bathe, a gun, and that when his committed to juil for murder. It appeared must be evidence, that Jackson took with h im, can be went to bathe, a gun, and that when his committed to juil for murder. It appeared that be evidence then had one dolla to the contain his pocket, supposed by Jackson. It is speed that Jackson murdered his commade while the water for this small sum, though it is but fair hear Jackson's present stary of the matter. He as they were "playing Indian" together that lie one was in the water, the other on land would put him the gun; but that, while he was taking turn with the gun, it went off, with the above unit. He is now in jail awaiting his trial, which he place at the next term of the Circuit Court.—leas Adectiver.

TILED ON'A RAILBOAD. The Paterson Guardian ILLED ON a RAILBOAN.—The Paterson Guardian is that a man, horribly methated, was discovered Honday morning lying on the railroad, about a s below Boiling Spring. It is supposed that he run ever by a cattle train on Sunday night. The y when found was so much mangled as to pret its recognition, and it is not even known other the man was a stranger. On the body were d a silver wat h and fob chain, and two rings he right hand. Lying near were three baker's rels, one with handle and two without. Mr. m. Berdan, of Boiling Spring, has the articles in possession, who will also give further informate any purson interested.

## FINANCIAL AND COMMERCIAL. MODRY MARKET.

Day after day we report continued dulmass in the mar-het. Nobedy wants to buy, nobedy has memory to pay or stocks. Now and then a little activity is infused into the market by a deficiency of stock for delivery on abort contracts, as is now the case in Erie, which is sun-named between 47 and 46 by this cause. But such sup-ment as this is fatal. The lass form Meany Bown the taimed between 47 and 48 by this cause. But such support as this is fatal. The loan from Mesers. Brown brothers is referred to by the friends of the Eric Company as a fail accompli; it is only to be paid we are told, as it wanted. The company require funds to enable them to earry on their additional work of construction, and hence the new credit. On the other hand, the bear, pretend—and the name of Mr. James Brown is given as an authority—that the company have not received a loan from Brown Brothers, but that that firm advanced £40,000 starling to the directors on their joint and respective endorsements. It is easy to perceive where the truth lice. The fact that the Eric have obtained money through the endorsation of the directors, and that their

truth lies. The fact that the Eric have obtained money through the endorsation of the directors, and that their present embarrasments are overcome, is not decided by any one. The future is another matter.

As compared with yesterday, most of the fancies have declined. Eric fell off this morning %; Reading, %; Cumberland, %; Nicaragua, %; and the others in proportion. New York Central improved %, the stock being scarce.

The Empire City, which arrived to day, brought some \$1,200,000 in gold, which with the disbursements from the treasury to pay for the assay office, and the specied drafts from California on the depository here, will make a total of nearly two millions receipts of specie in teadays. The steamer to-morrow will take out as much gold as can be got out of the Empire City's cargo.

Foreign manufactures are not as actively inquired for it was anticipated that they would be at this time of : year. In consequence, there is unusual dulness in to trade; and with accumulating supplies, and poor acco. medation from money lenders, importers are rather uncosy sellers. They would like to part with much of who g ods they have on hand, especially of British woollen fabrics, and all kinds of dress goods, with very rare ex fabries, and all kinds of dress goods, with very rare excoptions; but this they cannot do, unless on vary unsatisfactory terms, to which they are not as yet disposeto consent. In view of these circumstances, purchaser
are taking only what they are unable to award, as they
expect to be, shortly, able to seeme sufficiently ample
specks at lower rates. As to the prospect of their expetations being realized, it depends altogether upon the
magnitude of future arrivals, the quality of what goods
are yet to come forward, and the probable action of huperters. Should the receipts be ariensive, and of an unpopular description, it will be difficult for receivers to
avoid selling them at greatly reduced prices; because, if
they be held truty, factors will find but few buyers to
notice them. In case, however, this season's subsequent
arrivals do not be very heavy, nor of an undestrable
quality, it is quite probable that sellers will, by discreet
management, be enabled to seep up prices without materially restricting the transactic as.

Our Family Market Price Current.
Our table this week exhibits but a little change from the last excepting in fish, game, regetables and fruit. Game is not very plenty owing to the attention given to farming and harvesting at this time of the year, in the country, when all 'sportsmen, for a while, lay aside the gun for the rake and sickle. Vegetables have fallen a little, but fruit has gene up, and, no doubt, will continue at the present rates through the season owing to the failure of the crops in the different sections of the fruit growing country. The report from the rural districts is that the peach crop will be very light ewing to the late snow storms last spring, which nipped if in the bad and bloss m. It will be remembered that late is the month of April a severe mow storm swept the greater portion of the Northern States, to which is to be attributed this blight upon the fruit trees. In New Jarsey, of peaches there will not be more than a quarter of the urusal yield. The Camden and amboy Railroad Company own extending there will not be more than a quarter of the usual yield. The Camden and Amboy Rallroad Company own extensive orchards along their read, comprising between sixty and seventy-five thousand trees, which will this year produce hardly enough to pay for the gathering. The report from Belaware is about the same as that from New Jersey. All correspondents from the fruit regions of these States speak of the failure in the peach and angle error. and apple crop. From Western New York, larners write that the apple yield is good; but from the Southern sections of the State and from Jersey and Delaware, it is represented as being very light. Judging from this, all fruit caters will have to pay liberally for the indulgance of this appetite during the present season. Watermellons are very plenty, and thousands from the South arrive daily. All kinds of Southern fruit and a ready sale in consequence of the light crops of the North. The cholers no doubt calls forth some self denial in the indul-gence in fruit, jet the sale is very heavy. Green apples are plenty, and the main thing to be feared as a cholera
